

## Block Summary

In the next section there is a map and table showing the number of species per block. Those locations with the highest numbers tend to have protected open space and a combination of habitats including wetland, grassland, and forest.

The top ten blocks in terms of number of species (confirmed, probable, plus possible species) are:

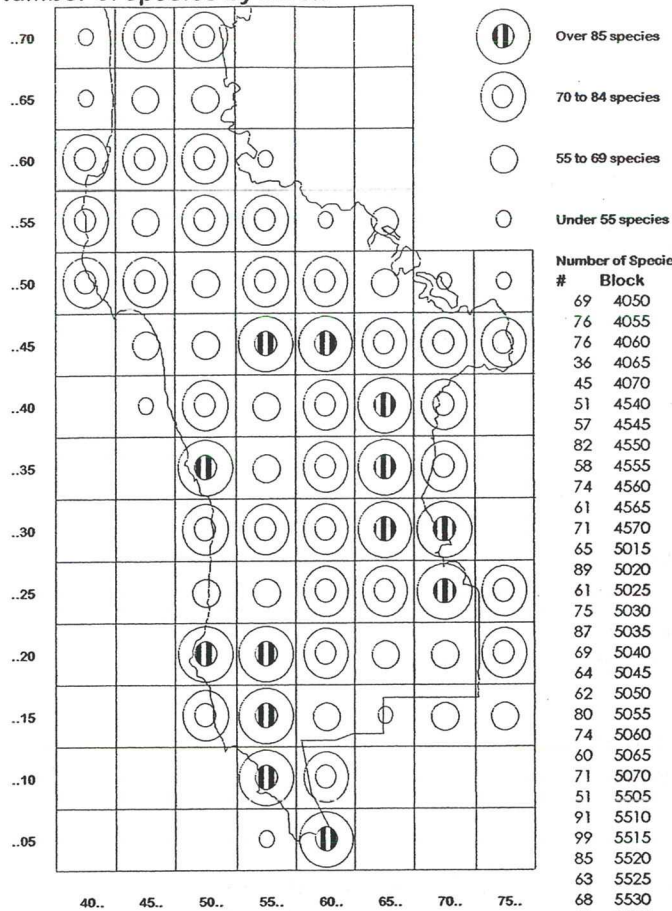

Species	Block	Block Locations
106	6535	Portola Valley, Windy Hill, Jasper Ridge
99	5515	Cloverdale Road, Gazos Creek, Butano State Park
97	7025	Skyline and Long Ridge Open Space
95	6005	Año Nuevo Bay and Creek to Wadell Creek
91	5510	Franklin Point and lower Gazos Creek
90	6045	Edgewood Park, Filoli Estate, Pulgas Open Space
89	5020	Pescadero Marsh
88	5545	Mills Creek and South West Watershed
88	6530	Williams Ranch and Langley Hill
88	6540	Woodside to Jasper Ridge

Following the county map is a detail list of species by block. Each species is coded with the breeding status category: CO for confirmed, PR for Probable, and PO for Possible breeding. The blocks are grouped by sections of the county to aid comparison of different regions.

A useful publication for reference to find the birds at many county locations is:

Richer, Cliff. Ed. 1996. *San Francisco Peninsula Birdwatching*. Sequoia Audubon Society. San Mateo, CA.
